Banagher Precast Concrete is an award-winning company with a reputation which has become synonymous with high quality products and customer service. With over 40 years experience, we aim to provide our customers with the most advanced precast concrete products and solutions available on the market today.

The hurling wall has been developed to facilitate ball control and allows players to practice off-season and in all types of weather. Each wall is designed to suit the needs of the individual client and complies with current codes for concrete structures. We believe that the Banagher Precast Hurling Wall is the best system on the market when it comes to flexibility of design, quality of finish, speed of installation and value for money.

- Unrivalled experience
- Designed to European standards

**USE FOR**

- Hurling
- Football
- Camogie
- Handball

**TECHNIQUE**

- REACTION
- SPEED
- POWER
- ACCURACY
“Every great player I met had a “secret” wall or gable or barn door where he sharpened and honed his skills. I wondered why it was that the stars practiced so rigorously and how much would ordinary players benefit from using the wall. If we had a wall long enough, the whole panel could be together generating energy and enjoyment. And now we know that not only can we develop technical skills but decision making and teamplay as well. Physical fitness needs can be met in a hurling specific way. Speed, power and accuracy are central to the modern game. These are embedded in every exercise and routine. Speed of foot, hand, eye, reaction, stroke and thought will be improved in every session. The confined space allows the coach focus on players at close range. Togetherness and team spirit will grow naturally. As our winters are getting wetter and fields become unplayable for months on end, a well-lit wall will provide really beneficial training time for all the club’s players. Wherever there are trained coaches the wall will guarantee dramatic improvement in skill levels and in player’s confidence.”

PAUDIE BUTLER, FORMER GAA NATIONAL DIRECTOR OF HURLING

“T he Hurling Wall erected by Banagher Precast Concrete for Piltown GAA Club has been a tremendous success. It has given an added dimension to our club facilities and is constantly in use by our under age teams along with numerous other clubs, schools and colleges that use our facilities. It has allowed us to cater for increased numbers at training, particularly at juvenile level, and has also allowed us undertake a wider range of skills training. We were appreciative of the advice we got from Banagher Precast Concrete when selecting and preparing the exact location within our ground and would recommend their service without hesitation.”

SECRETARY, PILTOWN GAA, KILKENNY

“O ur Hurling Wall at Golden National School, supplied and installed by Banagher Precast Concrete, has been of huge benefit to our school. The improvement in skill levels of young players of all abilities has been dramatic. Our Hurling Wall at Golden National School, supplied and installed by Banagher Precast Concrete, has been of huge benefit to our school. The improvement in skill levels of young players of all abilities has been dramatic. Our local club succeeded in winning a first juvenile hurling county title in over 50 years just 18 months after the installation of the wall. The staff of Banagher Precast Concrete at all levels were a pleasure to deal with and the completed job is extremely impressive.”

PRINCIPAL, GOLDEN NATIONAL SCHOOL, TIPPERARY

“W hen I was growing up in Banagher in the 1970’s we never left a hurl out of our hands. There was a big group of us that were obsessed with hurling and to be honest there wasn’t much else to do in Banagher at the time! Times have changed and the amount of time players can commit to hurling & training has reduced dramatically. This is where I see the vital part that a Banagher Precast hurling wall can make to a players development. An hour on the wall either individually or as part of a team session allows a player to get hundreds of touches and it provides a huge aid in developing and mastering the skills of the game. It is amazing to see the improvement in skill levels after only a few sessions on the hurling wall. Banagher Precast Concrete have been industry leaders for many years and can provide a range of hurling walls to suit both a club’s budget and available space. I would strongly recommend that you consult with them and look to improve the skill level of all players in your club.”

MICHAEL DUIGNAN, RTÉ HURLING ANALYST
ALL-IRELAND WINNING & ALL STAR OFFALY HURLER
The design options shown above are some of the projects we have completed for GAA clubs and schools across the country but our design team can provide a bespoke solution to suit your individual club requirements or the boundary restrictions of your grounds. We will engage with your committee and visit your site to discuss the best solution for your club.
