

BANAGHER
PRECAST CONCRETE

Quality Policy

2019-2020

**PRECAST
CONCRETE
SPECIALISTS**

Banagher Precast Concrete has an established policy to operate a Quality Management System for its design, manufacture and supply of precast and pre-stressed concrete products, ready mixed concrete, concrete blocks and aggregates that will fully meet the requirements of I.S EN ISO 9001:2015 Quality Management Systems and I.S EN 206-1: 2013 Concrete - specification, performance, production and conformity. In addition, in July 2013 Banagher Precast Concrete became certified for CE marking of precast products manufactured under Harmonised European standards.

It is the objective of the company to design and produce products, which conform to specified standards of quality, reliability and performance ensuring that the requirements of customers are satisfied.

We are committed to continual improvement of our Quality system.

The quality assurance procedures defined in the Quality Manual and its supporting documentation are mandatory for all staff. All staff shall be made aware of the quality assurance requirements.

The Quality Management System is continually and systematically reviewed for effectiveness and improvement.

Banagher Precast Concrete operates from our production facility in Ireland and also from our factory based in Norfolk, England, UK.

Brendan Mahon
Managing Director
