

**BANAGHER**  
PRECAST CONCRETE

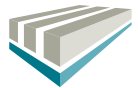

# Environmental Policy

2022

**PRECAST  
CONCRETE  
SPECIALISTS**

**Banagher Precast Concrete** has gained a reputation which has become synonymous with high quality products and customer service, placing us at the forefront of the construction and civil engineering industry. With over 70 years' experience we continue to design, manufacture and install precast and prestressed concrete products for national and international construction projects.

Operating from our extensive production facilities in Banagher, County Offaly and Norfolk, UK we are ideally located to service our growing customer base spread throughout Ireland, the U.K. and Continental Europe.

**Banagher Precast Concrete** is committed to environmental protection and sustainability, preventing pollution, continual improvement and minimising our impact.

We aim to continuously improve our Environmental Management System by vigorously challenging our existing outputs – our aim is to *'Tread Softly'* and minimise our impact on the environment for this generation and for those yet to come.

Banagher Precast Concrete is ISO 14001 accredited under the scope of the design, manufacture and installation of concrete products including the resourcing of raw materials.

It is our Policy to:

- Achieve a high standard of environmental performance through our Environmental Management System.
- Comply with all relevant environmental legislation and other requirements.
- Prevent pollution through effective control measures.
- Promote continuous improvement through the setting and reviewing of our environmental objectives and targets.
- Promote environmental and energy awareness to our employees through appropriate training and procedures.
- Manage our Waste through reduction, re-use, recycling and recovery.
- Make our Environmental Policy available to our employees, the public and all interested parties.
